In alignment with the commitment made by the Michigan Health & Hospital Association (MHA) Board of Trustees at their Nov. 4, 2020 meeting, my hospital/health system makes the following pledge to do our part in addressing systemic racism and health inequities that affect people of color and all marginalized populations in our communities. We have a unique responsibility to do this: healthcare is the largest employment sector in Michigan, meaning that we can lead by example in hiring practices and economic opportunity for all. At the same time, access to quality, affordable healthcare is extraordinarily important, and the current data on health disparities indicates a significant opportunity for improvement.

Specifically, the MHA and its members pledge to do the following:

- **We pledge to listen.** We will seek input from our employees, volunteers, medical staff, trustees, patients and families, business partners, and communities. We will do so in a variety of ways, to ensure that all voices are truly heard. We will facilitate and engage in community conversations about race, social determinants of health, implicit bias, and ways to identify and address local disparities in health outcomes.

- **We pledge to act.** We will do our part to identify and address disparities, put an end to systemic racism, and remove any and all barriers to health equity within our organizations and including partners within our communities. We will continue and strengthen the work we have already initiated to ensure equitable access to safe high-quality healthcare for all Michiganders. We will continue our strident advocacy for funding and regulatory policy at the state and federal levels that are critical to eliminating bias and removing healthcare disparities to achieve equitable outcomes.

- **We pledge to lead.** We will ensure that equity and inclusion are embedded within our organizational values and then operationalize those values through policy and practice. We will hold each other accountable to those values and provide education and support to our staff, medical providers, students and volunteers on cultural competence, implicit bias and healthcare disparities.

[ ] By checking this box, I hereby pledge to commit my organization to addressing racism and health disparities as indicated above.
