

Maternal and Infant Health Statistics Michigan, 2022

Prepared by Maternal and Child Health Epidemiology Section
Michigan Department of Health and Human Services
October 2024

Infant Mortality 2013-2022

Infant mortality is defined as a death of a baby before his or her first birthday, and is expressed as a rate per 1,000 live births.

Infant Mortality Rate, 2013-2022

Infant mortality is defined as a death of a baby before his or her first birthday and is expressed as a rate per 1,000 live births.

Cause of Infant Death, 2022

Infant mortality is defined as a death of a baby before his or her first birthday and is expressed as a rate per 1,000 live births.

Infant Mortality Rate by Maternal Race/Ethnicity, 2022

Infant mortality is defined as a death of a baby before his or her first birthday and is expressed as a rate per 1,000 live births.

Maternal Race	# Infant Deaths	# Live Births	Infant Mortality Rate (per 1,000 Live Births)	
Michigan	650	100,880	6.4	<div>6.4</div>
White Non-Hispanic	329	68,963	4.8	<div>4.8</div>
Black Non-Hispanic	228	17,111	13.3	<div>13.3</div>
Hispanic	28	7,030	4.0	<div>4.0</div>
Asian/Pacific Islander Non-Hispanic	22	4,066	5.4	<div>5.4</div>
American Indian Non-Hispanic	0<N<6	409	Data Not Sufficient	

Infant Mortality Rate Race Disparity, 2013-2022

Infant mortality is defined as a death of a baby before his or her first birthday and is expressed as a rate per 1,000 live births.

Infant Mortality by Expanded Native American Race/Ethnicity, 2022

Infant mortality is defined as a death of a baby before his or her first birthday and is expressed as a rate per 1,000 live births. More than one race: American Indian or Alaskan Native *and* another race; included only if AI/AN were reported first.

	# Infant Deaths	# Live Births	Rate per 1,000 Live Births
#1: Maternal Race: American Indian & Non-Hispanic	0<N<6	409	Data Not Sufficient
#2: Maternal Race: American Indian or more than one race*	10	1,008	9.9
#3: Maternal Race: American Indian or more than one race* <i>OR</i> Paternal Race: American Indian or more than one race*	15	1,734	8.7

Infant Mortality Rate by Maternal Age, 2022

Infant mortality is defined as a death of a baby before his or her first birthday and is expressed as a rate per 1,000 live births.

Infant Mortality Rate by Intended Payment Source, 2022

Infant mortality is defined as a death of a baby before his or her first birthday and is expressed as a rate per 1,000 live births.

Payment	# Infant Deaths	# Live Births	Infant Mortality Rate (per 1,000 Live Births)	
Michigan	650	100,880	6.4	6.4
Private Insurance	244	57,858	4.2	4.2
Medicaid	372	39,109	9.5	9.5

Infant Mortality Rate by Prosperity Region, 2022

Infant mortality is defined as a death of a baby before his or her first birthday and is expressed as a rate per 1,000 live births.

	# Infant Deaths	# Live Births	Rate per 1,000 Live Births
Michigan	650	100,880	<div></div> 6.4
Region 1	7	2,181	<div></div> 3.2
Region 2	16	2,597	<div></div> 6.2
Region 3	13	1,577	<div></div> 8.2
Region 4	89	17,799	<div></div> 5.0
Region 5	37	5,304	<div></div> 7.0

Region 10	293	41,893	<div></div> 7.0

Infants Celebrated First Birthday by Prosperity Region, 2022

Infant mortality is defined as a death of a baby before his or her first birthday.

■ Infants Celebrated 1st Birthday ■ Infant Deaths

Low Birthweight 2013-2022

Low birthweight is defined as number of live births with birthweight <2,500 grams.

Low Birthweight, 2013-2022

Low birthweight rate is defined as number of births with baby birthweight <2,500 grams per 100 live births.

Low Birthweight by Maternal Race/Ethnicity, 2022

Low birthweight rate is defined as number of births with baby birthweight <2,500 grams per 100 live births.

Maternal Race	# LBW	# Live Births		Percent (%) Low Birthweight
Michigan	9,242	100,880	9.2%	9.2%
White Non-Hispanic	5,183	68,963	7.5%	7.5%
Black Non-Hispanic	2,723	17,111	15.9%	15.9%
Hispanic	560	7,030	8.0%	8.0%
Asian/Pacific Islander Non-Hispanic	413	4,066	10.2%	10.2%
American Indian Non-Hispanic	36	409	8.8%	8.8%

Low Birthweight by Expanded Native American Race/Ethnicity, 2022

Low birthweight rate is defined as number of births with baby birthweight <2,500 grams per 100 live births.
More than one race: American Indian or Alaskan Native *and* another race; included only if AI/AN were reported first.

	# Low Birthweight	# Live Births	% Low Birthweight
#1: Maternal Race: American Indian & Non-Hispanic	36	409	8.8%
#2: Maternal Race: American Indian or more than one race*	97	1,008	9.6%
#3: Maternal Race: American Indian or more than one race* <i>OR</i> Paternal Race: American Indian or more than one race*	154	1,734	8.9%

Low Birthweight by Maternal Age, 2022

Low birthweight rate is defined as number of births with baby birthweight <2,500 grams per 100 live births.

Low Birthweight by Intended Payment Source, 2022

Low birthweight rate is defined as number of births with baby birthweight <2,500 grams per 100 live births.

Payment	# LBW	# Live Births	Percent (%) Low Birthweight	
Michigan	9,242	100,880	9.2%	9.2%

Healthy Birth Weight by Prosperity Region, 2022

‘Healthy Weight’ births is defined as live births that weigh 5.5lbs (or 2,500 grams) or greater.

Preterm Births 2013-2022

Preterm birth is defined as number of live births delivered before 37 completed weeks of gestation.

Preterm Birth, 2013-2022

Preterm birth rate is defined as number of births delivered before 37 completed weeks of gestation per 100 live births.
Gestational age is based on the obstetric estimate of gestation.

Preterm Birth by Maternal Race/Ethnicity, 2022

Preterm birth rate is defined as number of births delivered before 37 completed weeks of gestation per 100 live births.
Gestational age is based on the obstetric estimate of gestation.

Maternal Race	# Preterm	# Live Births		Percent (%) Preterm
Michigan	10,427	100,880	10.3%	10.3%
White Non-Hispanic	6,398	68,963	9.3%	9.3%
Black Non-Hispanic	2,568	17,111	15.0%	15.0%
Hispanic	688	7,030	9.8%	9.8%
Asian/Pacific Islander Non-Hispanic	365	4,066	9.0%	9.0%
American Indian Non-Hispanic	48	409	11.7%	11.7%

Preterm Birth by Expanded Native American Race/Ethnicity, 2022

Preterm birth rate is defined as number of births delivered before 37 completed weeks of gestation per 100 live births.

Gestational age is based on the obstetric estimate of gestation.

More than one race: American Indian or Alaskan Native *and* another race; included only if AI/AN were reported first.

Method	# Preterm	# Live Births	% Preterm
1: Maternal Race: American Indian & Non-Hispanic	48	409	11.7%
2: Maternal Race: American Indian or more than one race*	114	1,008	11.3%
3: Maternal Race: American Indian or more than once race* OR Paternal Race: American Indian or more than one race*	182	1,734	10.5%

Preterm Birth by Maternal Age, 2022

Preterm birth rate is defined as number of births delivered before 37 completed weeks of gestation per 100 live births.
Gestational age is based on the obstetric estimate of gestation.

Preterm Births by Intended Payment Source, 2022

Preterm birth rate is defined as number of births delivered before 37 completed weeks of gestation per 100 live births.
Gestational age is based on the obstetric estimate of gestation.

Payment	# Preterm	# Live Births	Percent (%) Preterm	
Michigan	10,427	100,880	10.3%	10.3%
Private Insurance	5,438	57,858	9.4%	9.4%
Medicaid	4,730	39,109	12.1%	12.1%

Preterm Birth by Prosperity Region, 2022

Preterm birth rate is defined as number of births delivered before 37 completed weeks of gestation per 100 live births.
Gestational age is based on the obstetric estimate of gestation.

	# Preterm	# Live Births	% Preterm
Michigan	10,427	100,880	<div></div> 10.3%
Region 1	161	2,181	<div></div> 7.4%
Region 2	232	2,597	<div></div> 8.9%
Region 3	137	1,577	<div></div> 8.7%
Region 4	1,849	17,799	<div></div> 10.4%
Region 5	563	5,304	<div></div> 10.6%
Region 6	925	8,260	<div></div> 11.2%
Region 7	456	4,542	<div></div> 10.0%
Region 8	727	7,696	<div></div> 9.4%

Region 10	4,525	41,893	<div></div> 10.8%

Full Term Births by Prosperity Region, 2022

Full term births include live births born after 37 completed weeks gestation.

Prenatal Care Utilization 2022

Prenatal Care Utilization by Maternal Race/Ethnicity, 2022

‘No prenatal care’ is a proportion of all live births. ‘Late prenatal care’ is calculated among live births where prenatal care was accessed. Late entry into prenatal care refers to prenatal care beginning in the third trimester.

Maternal Race	% No Prenatal Care	% Late Prenatal Care
Michigan	 2.1%	 4.3%
White Non-Hispanic	 1.5%	 3.9%
Black Non-Hispanic	 4.1%	 4.9%
Hispanic	 2.3%	 6.8%
Asian/Pacific Islander Non-Hispanic	 1.1%	 3.7%
American Indian Non-Hispanic	 2.7%	 5.0%

Barriers to Prenatal Care Michigan 2016-2022

Barriers to Prenatal Care among Mothers who started PNC *after* 1st trimester and wanted to start sooner, 2016-2022

Around half (51.5%) of mothers who started PNC after the first trimester were okay with that timing.

Breastfeeding Initiation and Duration 2004-2022

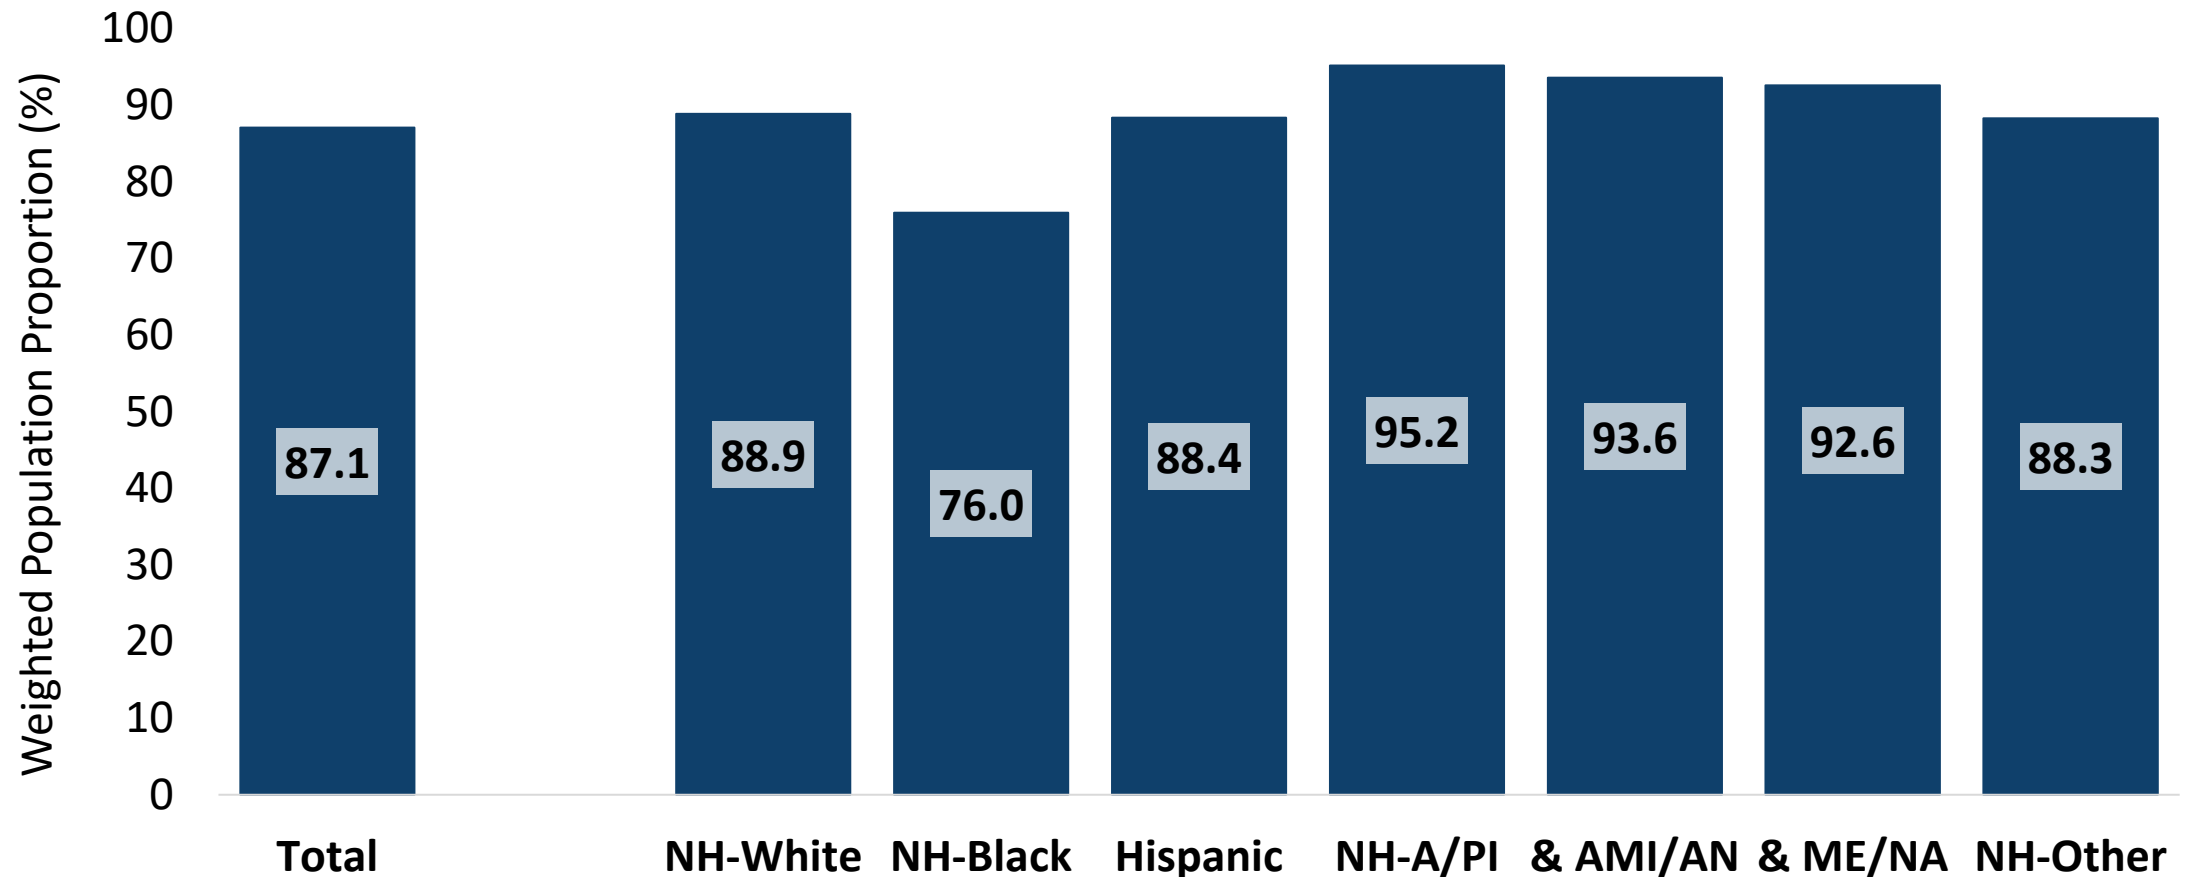

Breastfeeding Initiation + Duration 2004-2022

Breastfeeding Initiation by Race/Ethnicity, 2016-2022

Most categories = maternal race/ethnicity information alone contributes.

& = maternal or paternal race/ethnicity/ancestry overwrite all other possible categories.

Breastfeeding 3-Month Duration by Race/Ethnicity, 2016-2022

Most categories = maternal race/ethnicity information alone contributes.

& = maternal or paternal race/ethnicity/ancestry overwrite all other possible categories.

Neonatal Abstinence Syndrome 2013-2022

About the Data

1. Neonatal Abstinence Syndrome (NAS) cases are identified by diagnosis code (ICD-9 779.5 or ICD-10 P96.1) from the Michigan Inpatient Database. The transition from ICD-9 to ICD-10 started in Fall 2015. This may contribute to some **fluctuation in the data**.
2. **NAS cases may be underreported** with the increasing popularity of non-pharmacological interventions, which may not be consistently captured in the data.
3. **The goal of NAS surveillance is *not* to reduce the number of cases to zero.** This is due to limitations with current surveillance practices. They do not allow us to distinguish between a) women with untreated opioid use or other substance use disorder or b) women with opioid use disorder on medicated assisted therapy, or c) women on long term opioid, benzodiazepine or barbiturate therapy for a chronic disease condition.
4. NAS rates are calculated per 1,000 live births in order to be consistent with the CSTE case definition. Previous reports published by MDHHS include NAS rates per 100,000 live births.

Neonatal Abstinence Syndrome, 2013-2022

2010-2015: 779.5 (drug withdrawal syndrome in newborn) and
2016-current: P96.1 (neonatal withdrawal symptoms from maternal use of drugs of addiction).

Neonatal Abstinence Syndrome by Maternal Race/Ethnicity, 2022

2010-2015: 779.5 (drug withdrawal syndrome in newborn) and
2016-current: P96.1 (neonatal withdrawal symptoms from maternal use of drugs of addiction).

Maternal Race	# NAS Cases	# Live Births	NAS Rate per 1,000 Live Births	
Overall	605	100,880	6.0	6.0
White non-Hispanic	467	68,963	6.8	6.8
Black non-Hispanic	51	17,111	3.0	3.0
Hispanic	43	7,030	6.1	6.1
Asian/Pacific Islander	0<N<6	4,066	Data Not Sufficient	
American Indian	12	409	29.3	29.3

Neonatal Abstinence Syndrome by Prosperity Region, 2022

2010-2015: 779.5 (drug withdrawal syndrome in newborn) and
2016-current: P96.1 (neonatal withdrawal symptoms from maternal use of drugs of addiction).

	# NAS Cases	# Live Births	Cases per 1,000 Live Births
Michigan	605	100,880	6.0
Region 1	44	2,181	20.2
Region 2	16	2,597	6.2
Region 3	20	1,577	12.7
Region 4	46	17,799	2.6
Region 5	64	5,304	12.1
Region 6	102	8,260	12.3
Region 7	23	4,542	5.1
Region 8	50	7,696	6.5
Region 9	43	9,031	4.8
Region 10	196	41,893	4.7

Sleep-Related Infant Death Rate 2010-2021

Deaths to infants less than 1 year of age that occur suddenly and unexpectedly due to suffocation/positional asphyxia, sudden infant death syndrome, undetermined/unexpected infant death, and other causes where the sleep environment was likely to have contributed to the death.

Sleep-Related Infant Deaths 2010-2021

Between 2010 and 2021, there were **1,755** sleep-related infant deaths in Michigan. The sleep-related infant death rate has fluctuated slightly but has not statistically significantly differed during this time.

Deaths per 1,000 Live Births

# deaths	140	147	131	142	152	159	142	123	151	149	161	158
----------	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----

Sleep-Related Infant Deaths by Prosperity Region, 2010-2021

Data for regions 5 and 7 suppressed as to not inadvertently identify suppressed county level statistics.

	# Infant Deaths	Sleep Related Deaths Per 1,000 live births
Michigan	1,755	1.3
Region 1	39	1.2
Region 2	32	0.9
Region 3	39	1.9
Region 4	231	1.0
Region 5	*	
Region 6	185	1.7
Region 7	*	
Region 8	152	1.5
Region 9	134	1.1
Region 10	758	1.4

Sleep-Related Infant Deaths by Race, 2016-2021

Between 2016 and 2021, Black infants were **4.6** times more likely to die of sleep-related causes as compared to white infants. American Indian infants were **3.5** times more likely to die of sleep-related causes as compared to white infants.

Low-Risk Cesarean 2013-2022

$$\frac{\# \text{ cesarean among 1st births low risk females}}{\# \text{ 1st births to low risk females}}$$

Low-risk: full term, singleton births, and vertex presentation.

Low-Risk Cesarean by Maternal Race/Ethnicity, 2022

Low-risk cesarean is a ratio of the number of first births delivered by cesarean section to low-risk females (full-term, singleton births, vertex presentation) to the number of first births to low-risk females (full-term, singleton births, vertex presentation).

Maternal Race	# Low Risk Cesarean	# Low Risk 1st Births		Percent (%) low-risk births with no prior birth had a cesarean
Michigan	7,544	26,742	28.2%	 28.2%
White Non-Hispanic	5,137	18,880	27.2%	 27.2%
Black Non-Hispanic	1,136	3,745	30.3%	 30.3%
Hispanic	511	1,830	27.9%	 27.9%
Asian/Pacific Islander Non-Hispanic	472	1,327	35.6%	 35.6%
American Indian Non-Hispanic	28	108	25.9%	 25.9%

Low-Risk Cesarean by Prosperity Region, 2022

Low-risk cesarean is a ratio of the number of first births delivered by cesarean section to low-risk females (full-term, singleton births, vertex presentation) to the number of first births to low-risk females (full-term, singleton births, vertex presentation).

	# Low Risk Cesarean	# Low Risk 1 st Births	% Low Risk Cesarean
Michigan	7,544	26,742	28.2%
Region 1	132	557	23.7%
Region 2	195	727	26.8%
Region 3	112	467	24.0%
Region 4	1,279	4,932	25.9%
Region 5	374	1,299	28.8%
Region 6	581	2,012	28.9%
Region 7	377	1,178	32.0%
Region 8	499	1,937	25.8%
Region 9	593	2,305	25.7%
Region 10	3,402	11,328	30.0%

Severe Maternal Morbidity Rate 2011-2021

The unexpected outcomes of labor and delivery that result in significant short- or long-term consequences to a woman's health.

About Severe Maternal Morbidity

The unexpected outcomes of labor and delivery that result in significant short- or long-term consequences to a woman's health.

Inclusion Categories:

- Acute Heart Failure/Pulmonary Edema.
- Acute Myocardial Infarction.
- Acute Renal Failure.
- Adult Respiratory Distress Syndrome.
- Air and Thrombotic Embolism.
- Amniotic Fluid Embolism.
- Aneurysm.
- ~~Blood Transfusions.~~
- Cardiac Arrest/Ventricular Fibrillation.
- Conversion of Cardiac Rhythm.
- Disseminated Intravascular Coagulation.
- Eclampsia.
- Heart Failure/Arrest during Procedure or Surgery.
- Hysterectomy.
- Puerperal Cerebrovascular Disorder.
- Sepsis.
- Severe Anesthesia Complications.
- Shock.
- Sickle Cell Disease with Crisis.
- Temporary Tracheostomy.
- Ventilation.

Severe Maternal Morbidity, 2011-2021

The unexpected outcomes of labor and delivery that result in significant short- or long-term consequences to a woman's health.

Severe Maternal Morbidity *Excluding Transfusions* by Prosperity Region, 2021

Hospitalizations per 10,000 Inpatient Delivery
Hospitalizations (**Michigan: 100.0**)

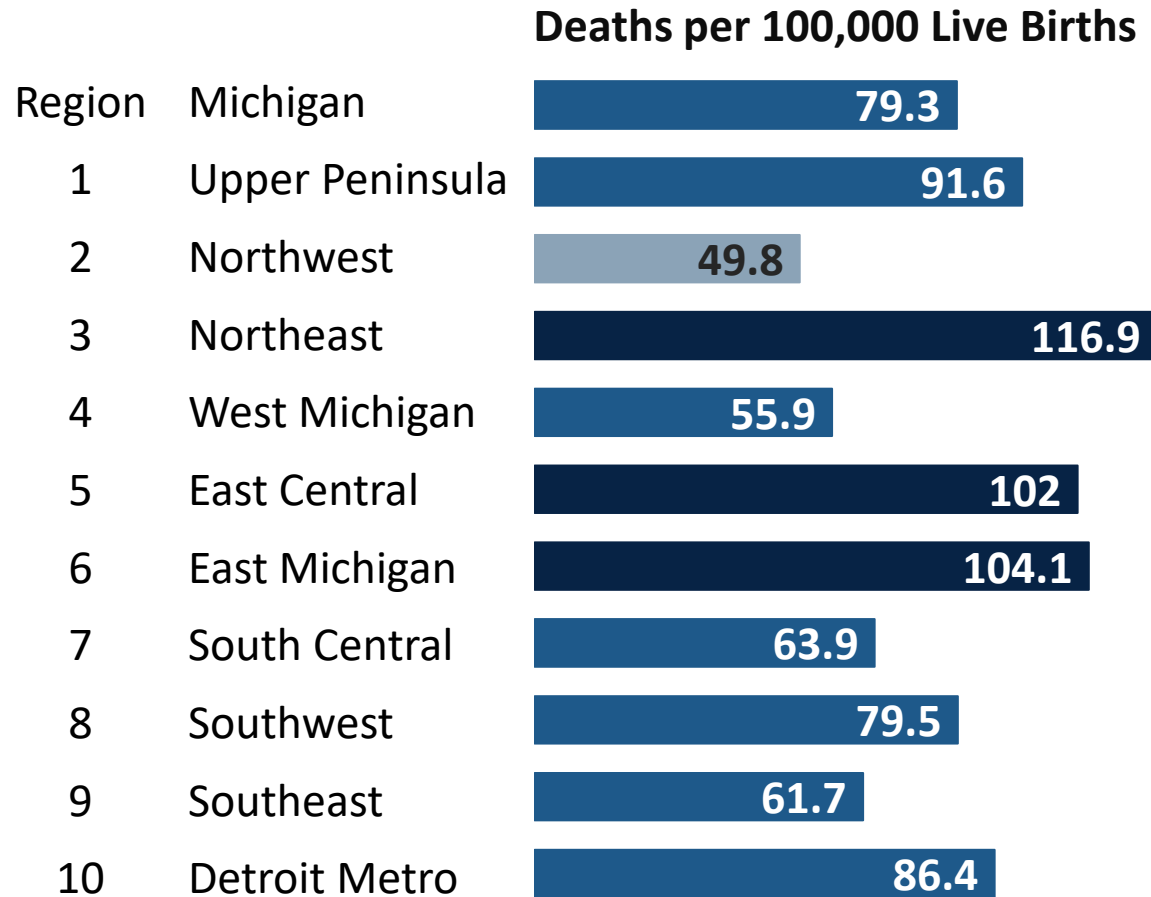

Maternal Mortality Ratio 2016-2020

Maternal deaths include deaths that occur during pregnancy, at delivery or within one year of pregnancy.

Total Maternal Mortality by Prosperity Region, 2016-2020

Total (pregnancy-associated) maternal deaths include deaths that occur during pregnancy, at delivery or within one year of pregnancy, including 1) deaths that are related to the pregnancy 2) unrelated to the pregnancy 3) as well as where it is unknown.

Maternal Mortality Rate by Race, 2016-2020

Maternal deaths include deaths that occur during pregnancy, at delivery or within one year of pregnancy.
Races other than white and Black were suppressed due to sample sizes less than six.

Pregnancy-Related Maternal Mortality

(directly related or aggravated by the pregnancy)

Deaths per 100,000 Live Births

Pregnancy-Associated – Not Related – Maternal Mortality

(death unrelated to the pregnancy)

Deaths per 100,000 Live Births
